The huge success of the 'Islander' built by All American Marine, for Island Packers, in 2001 led to a sister ship design and construction of the 'Island Adventure'. Island Packers contracts with the National Park Service to ferry campers and day trippers from Ventura, California, to the Channel Islands National Park, 20 miles across the Santa Barbara Channel. The 65' x 24' high-speed Teknicraft catamaran 'Island Adventure' is the newest addition to the Island Packers fleet.

The 'Island Adventure' makes the crossing to Santa Cruz, the largest and most popular of the Islands, in less than 45 minutes vs. over 2 hours with Island Packers previous fleet of monohulls. The vessel is designed to comfortably load passengers and gear from either the stern or bow and on either side in all weather conditions.

"Due to our season of operation it was critical that we have the boat built and in service when it was supposed to be, All American Marine not only built another outstanding boat for us but it was delivered on time and on budget!" said Alex Brodie, co-owner and captain of the company's newest addition.
